

Year 3 music

Week 3

You will need a device of some kind (a laptop/tablet/phone) that has the internet on it.

Following on from our lessons on composing songs, this week we are going to use this website to create a piece of music that reflects how you're feeling today.

<https://musiclab.chromeexperiments.com/Song-Maker/>

You can change the *timbre* (instrument sound), *pitch*, *tempo* (speed), make the piece longer by adding bars, or even record your voice!

You may want to have a few practices to understand how the website works and then you can save your final piece of music.

Why does the piece you've created reflect how you're feeling?
