

Week 4 Creative challenge

Each week we will be setting really fun tasks to help you to think, create and find out new things. You have a choice of two activities (as we know you might not have the resources in your house for everything). You can choose to do either activity or both.

Learn to tie your shoelaces.

Something that appears simple but can be tricky to master! Spend time practicing how to tie your shoelaces to get a tight, secure knot.

Design and make your own board game before teaching your family how to play.

Find out! What is the Success Criteria for an effective board game?

Think! How can I add levels of difficulty to make the game harder or easier?

Challenge! Can you design and make a box (using a cereal or shoebox) to store your game in?
